

The Transtech & Baumer Partnership

Baumer

Passion for Sensors

PRODUCT OVERVIEW

Baumer

SENSOR RANGE

Baumer has been represented in Australia by Transtech since 1996, Transtech is proud that Baumer Group has formed a partnership with their longest serving distributor in Australia. TransTech has become a Distributor for the full range of Baumer products – Sensors – Encoders - Process Instrumentation.

Incremental and sine encoders. Versatile and reliable.

Incremental encoders are for detecting relative position shifts. Their main benefits are rather simplified signals, extreme ruggedness and reliable operation even under extreme temperature variations and adverse ambient conditions. Baumer incremental encoders in all their facets are outstanding by the big design variety impulse numbers.

Magnetic sensors. Robust and modular.

Confined space, dirt, shocks and vibrations. Baumer magnetic encoders are perfect for top-rate performance in a challenging environment. By their bearingless, compact design they are extremely robust, durable and also suitable for very big shaft diameters. Modular combinations of sensors and pole wheels enable efficient solutions for any situation.

See page 387

Tachogenerators. Precise and durable.

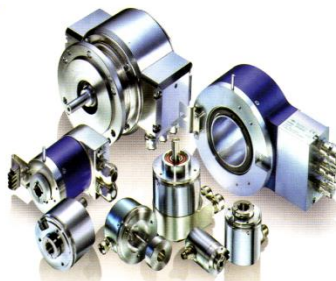

High precision in transforming the tachovoltage over the total speed range - that's what Baumer analogue tachogenerators can do thanks to their patented LongLife commutator providing a massive silver track embedded in the surface. This silver track ensures a constantly low transfer resistance even under adverse ambient conditions. Especially task-matching brushes in conjunction with the LongLife commutator ensure an excellent maintenance-free service life.

See page 425

Absolute encoders. Innovative and flexible.

Times have changed. Obsolete complicated cabling connecting the control cabinet with the encoders is nowadays often replaced by absolute multiturn encoders with fieldbus interface. This results from ever-changing requirements on functionality and machines and facilities becoming more and more spacious. Today, innovative and flexible solutions are sought after - and Baumer does offer them.

See page 197

Accessories.

Versatile accessories for quick commissioning and safe, reliable operation of the Baumer encoder solutions - optimized to suit your application needs.
